24. Description of Change: (use additional Sheets if necessary)
The AMASS database (index) is crucial in making AMASS function. ECS has experienced problems with restarting AMASS hosts and having database problems on restart. The backup tape within the tape library is the only volume that has the database data and if it is not readable, then AMASS will not function.

25. Proposed Solution: (use additional sheets if necessary)
Temporarily adding Concord 3490 tape stackers to g0drg01 and g0drg02. We will be sending over a total of 4 Concord 3490 tape stackers to GSFC, 2 will be installed and the other 2 will be held as spares. Currently we have enough stackers on hand to complete this action.

26. Alternate Solution: (use additional sheets if necessary)
Do nothing and be at risk of losing data.

27. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Vulnerable to unrecoverable AMASS database corruption.
